

In Bitcoin We Unite

UniSat Hexa, brc-20 upgrade, Taproot Assets, and more...

PRESENTED BY:

Lorenzo
Director, UniSat

Unisat Hexa

Our upcoming next-gen hybrid trading engine
for all Bitcoin assets (HEX)

HEX A

So . . . what's a HEX?

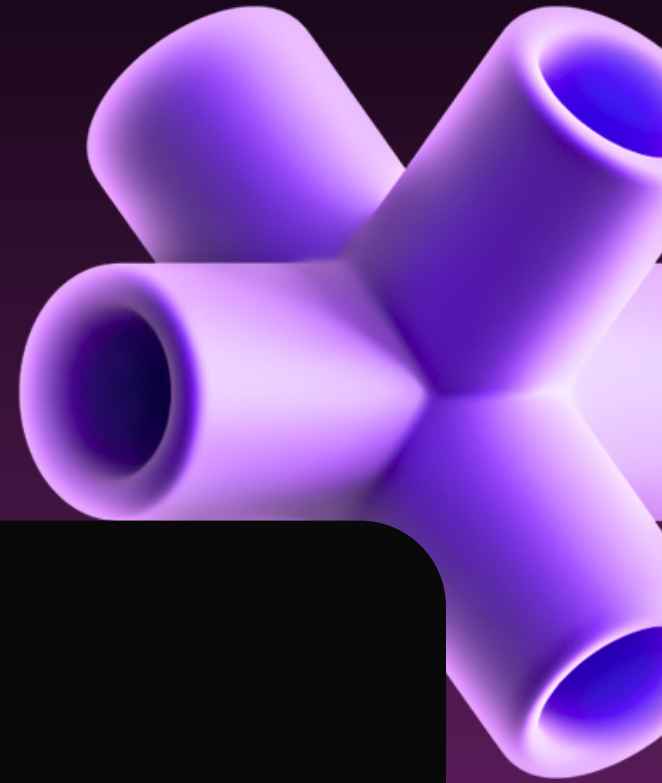

Unified trading experience
across many kinds of assets

Feels like you're trading on a CEX

Self-custodial asset
management

Natively within your wallet like on a DEX

Unique trading experience

Assets & Protocols

Directly supports top-100 market cap assets
on Bitcoin

Covers various protocols including
brc-20, Runes, Taproot Assets, etc...

You name it. We add it.

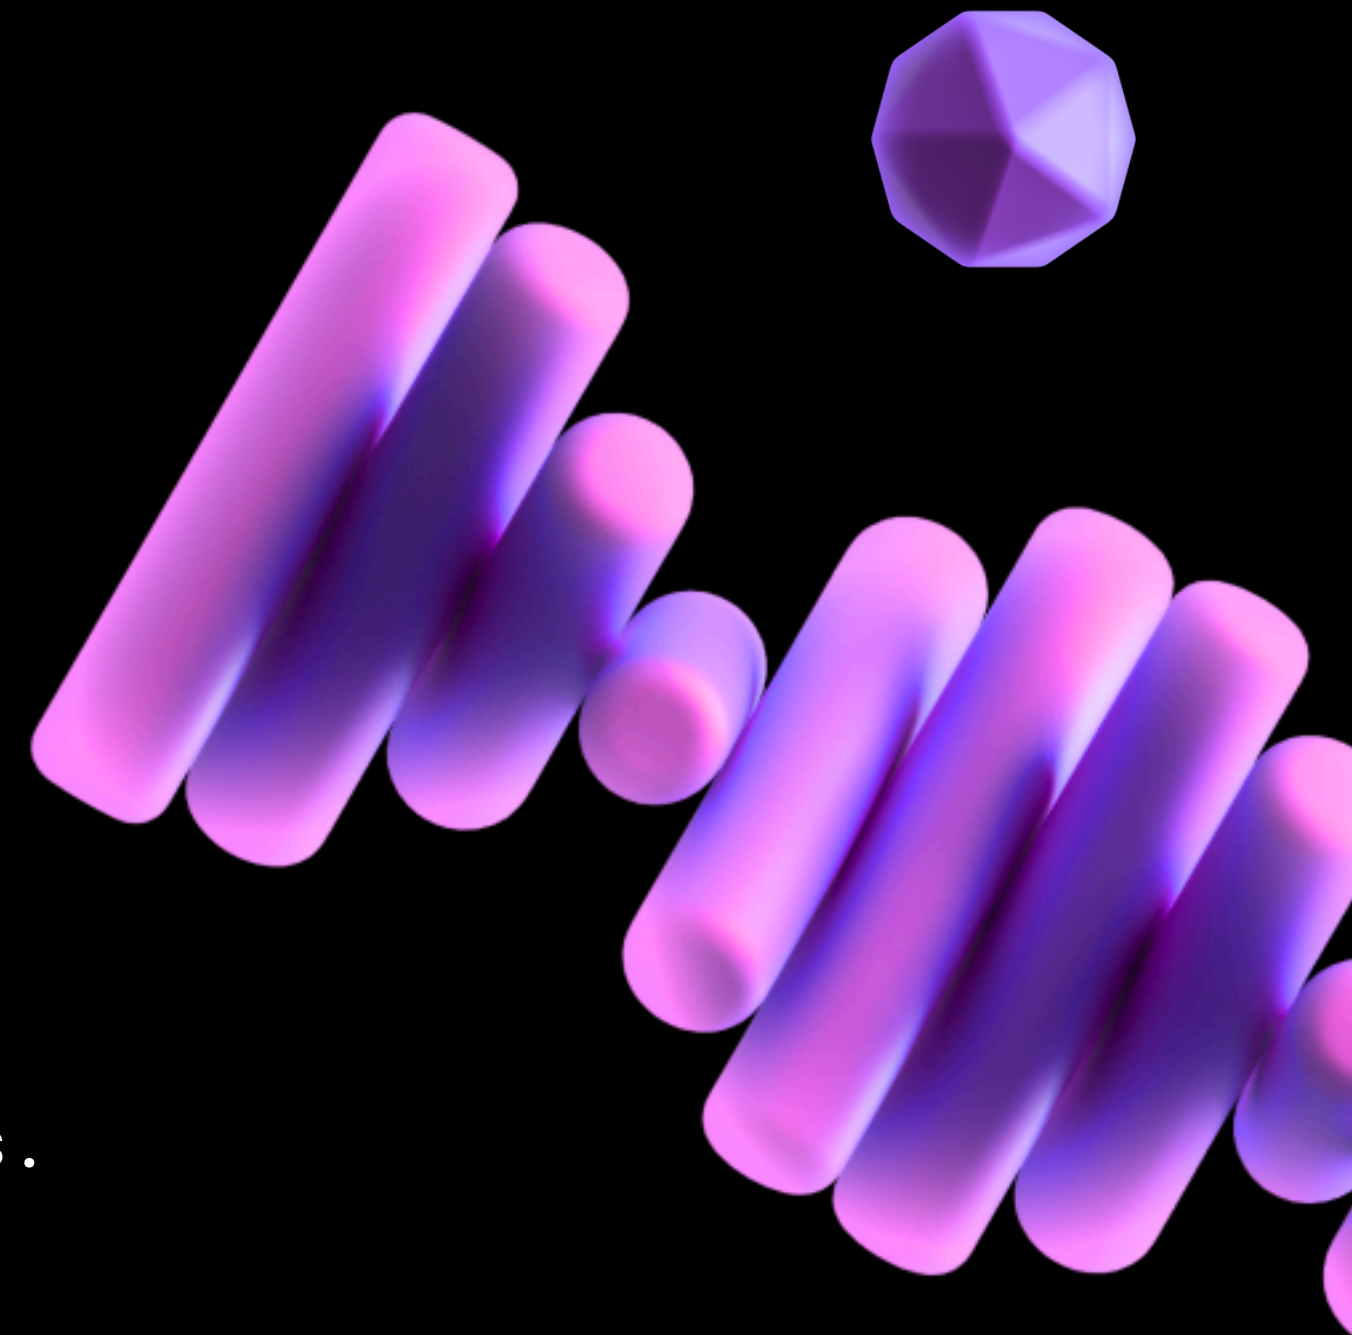

Ledger Implementation

Full order history on-chain

Every single transaction is committed to the blockchain and persisted on-chain for complete and continuous tracking

Full orderbook in mempool

For any given transaction, the trading engine is authorized to access the assets being traded in a tiny timeframe when the transaction is being processed

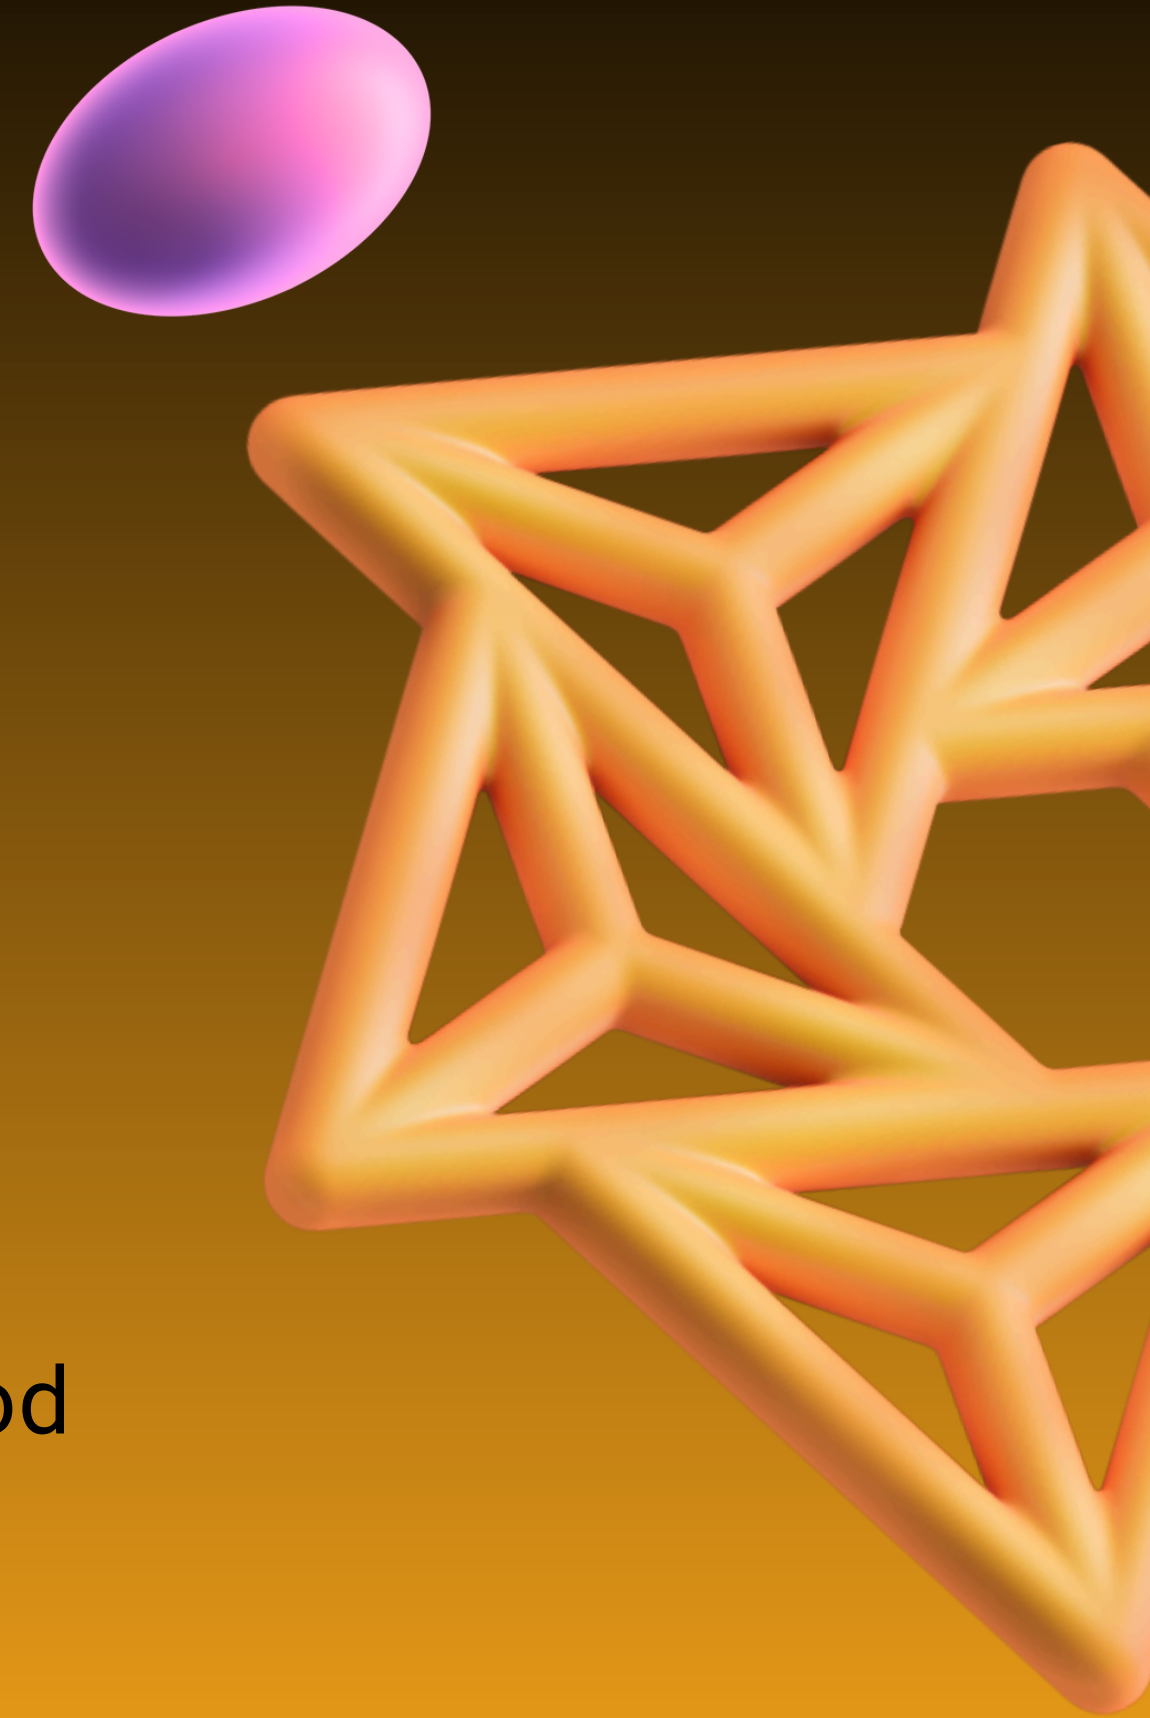

Everything literally happens in the mempool and blocks.

Infrastructure

Fractal Bitcoin is used as the infrastructure
(Fractal-as-a-Service)

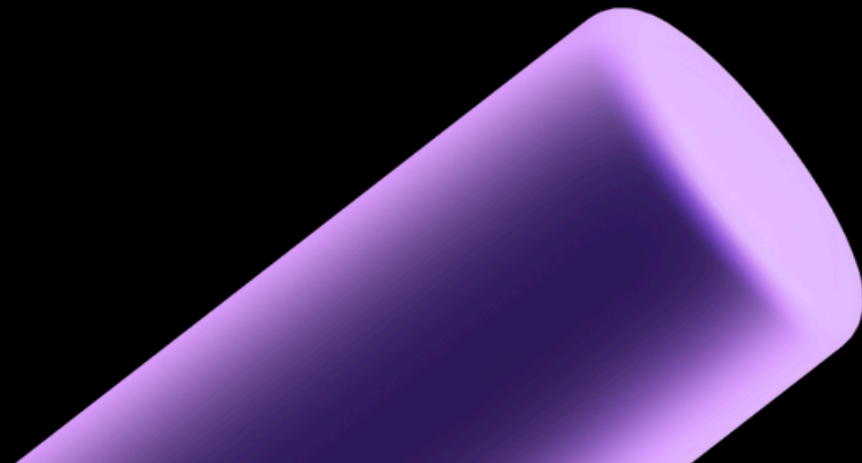

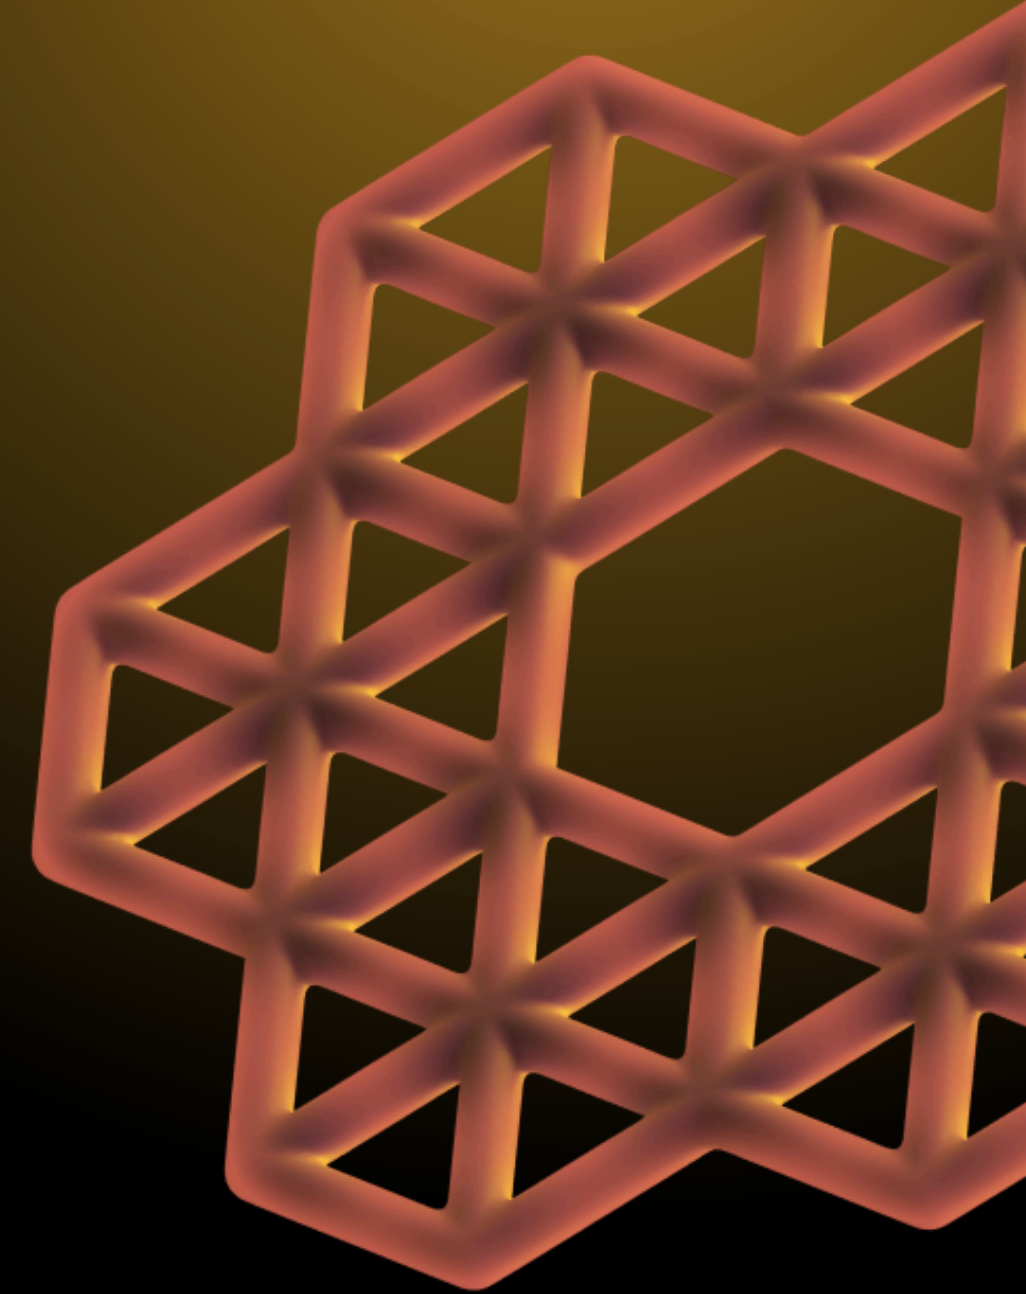

We use 20x blocks and 30s confirmation for good

Goal

A comprehensive
liquidity provider for
the Bitcoin ecosystem

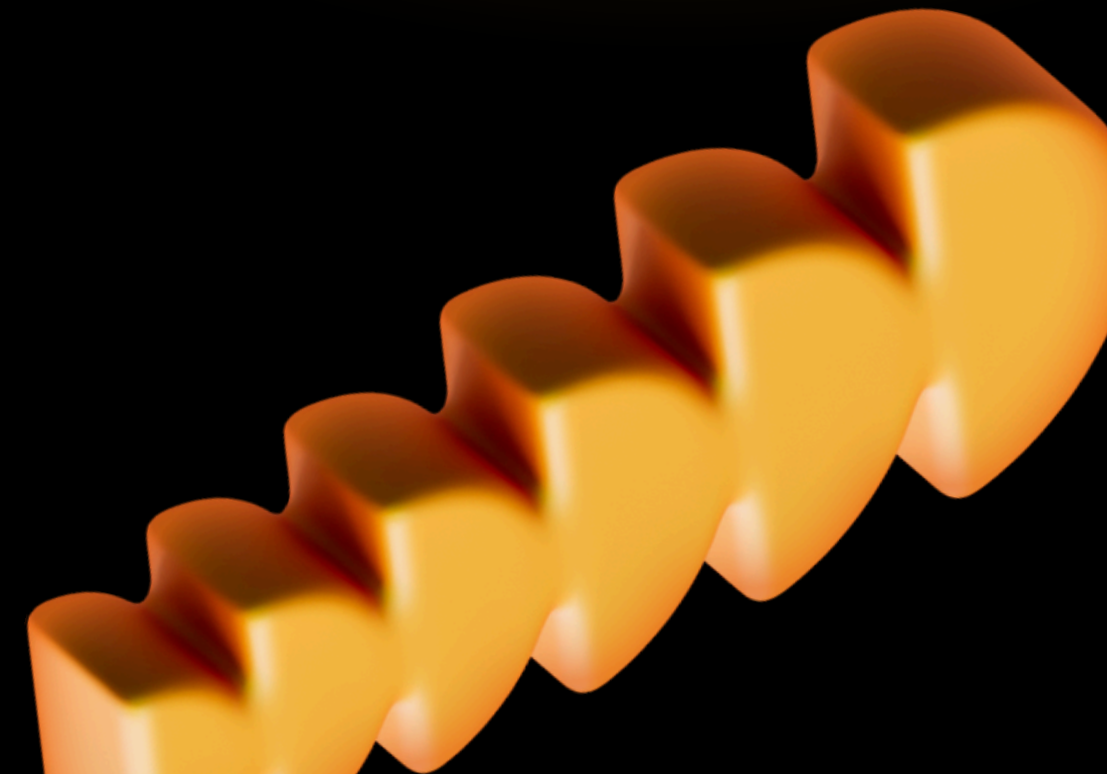

brc-20 upgrade in 2025

The first significant upgrade for brc-20

Single-step
TRANSFER

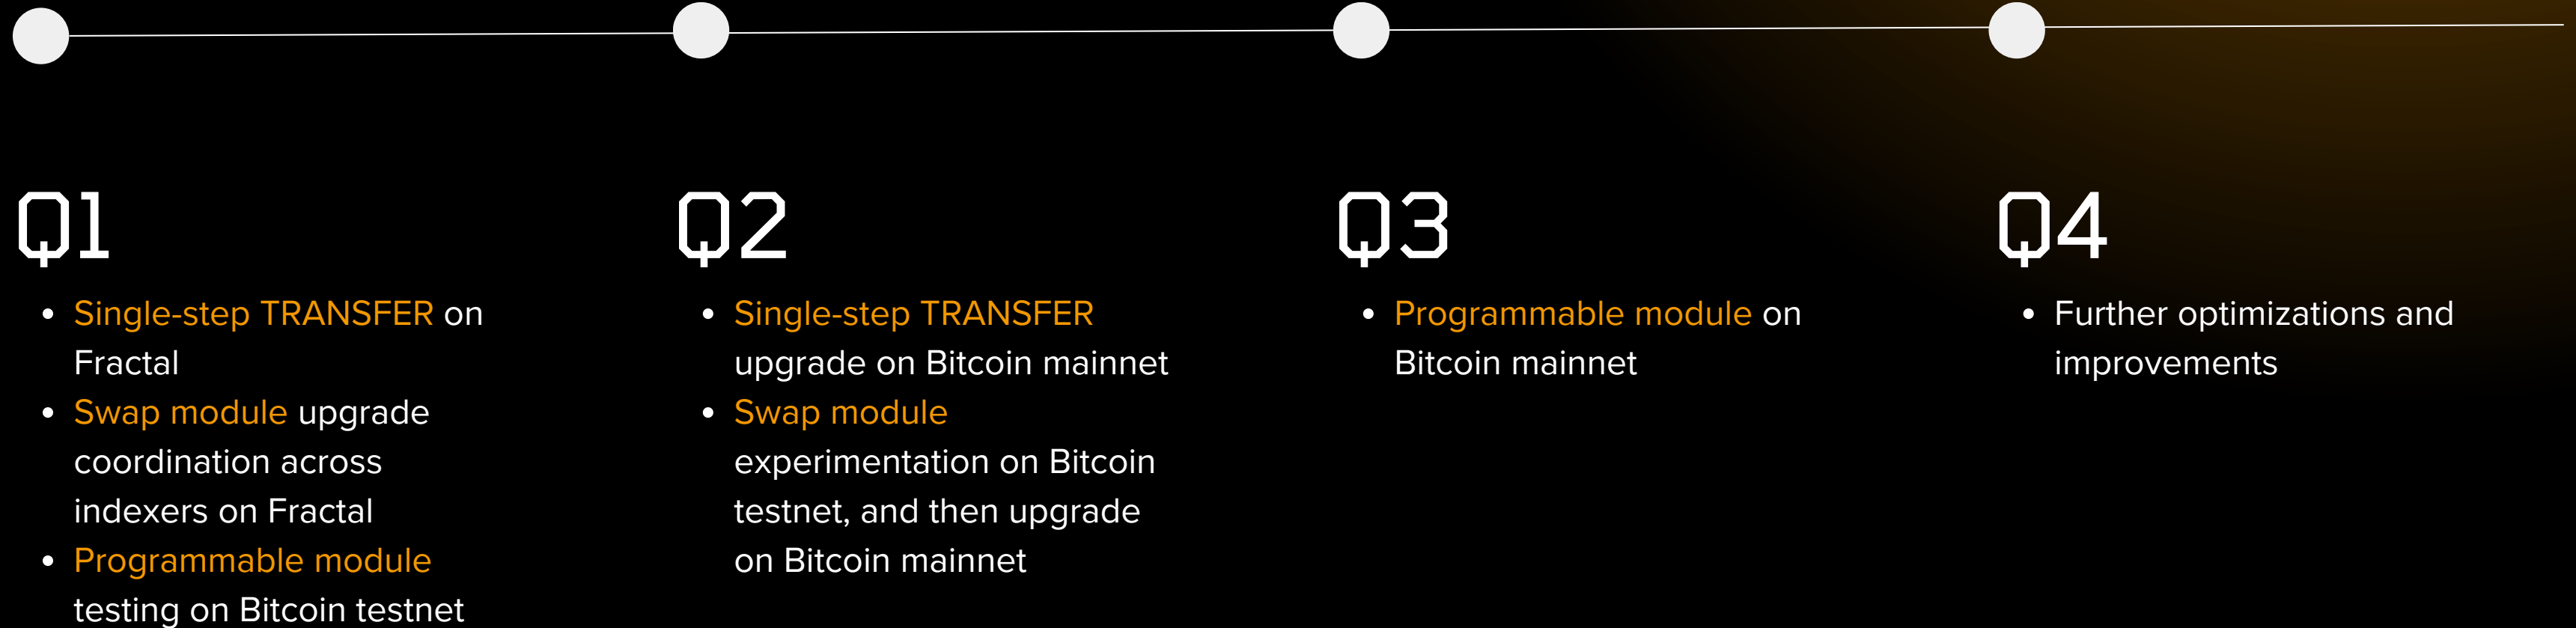

Programmable
module

Swap
module

brc-20 upgrade in 2025

The schedule for upgrades (drafted)

Taproot Assets Experiments

Native Stablecoin Support

On **UniSat Hexa**

Taproot Assets Support

First-class support in **UniSat Wallet** & **UniSat Explorer**
+ Extended support on **PizzaSwap**

Taproot Settlement

Utilizing Taproot settlement on Bitcoin for **Fractal**

OpenAPI for everything above

Unified API support for all products mentioned above

Unified Bitcoin/Fractal network for both users and developers

Permissionlessly use core functionalities without authorization

Open in advance: deploy a full UniSat Infrastructure instance on your hardware, \$0 service fee

Build on Bitcoin, with full support from us.

Hexa

A comprehensive liquidity provider
for Bitcoin

Swap

Seamlessly operating on both
Bitcoin & Fractal optimally

Every effort is made to bridge the gaps between
assets, protocols, and networks.

In Bitcoin, we unite!

Thank You

We want to try it out.

Lorenzo
